"MAKE A HOBBY OF HARDY SEMPERVIVUMS"

..... DESCRIPTIVE LIST OF SEMPERVIVUMS

- RUBRA RAY A hybrid, similar to Powelii coloring, green with deep red at base, red continuing out to the tip of leaves early in the spring, later green crowds the red back.
- HEUFFELII Bluish-green, broad purplish tip, does not have offsets. Multiplies by division. Grows to 3-1/2".
- RUBRA ASH Deep purplish-red center, leaves edged in white hairs with the outer leaves with a slight tinge of ambergreen.
- ARCHNOIDEUM Small green rosettes, very cob-webby, offsets hug mother plant, 15 to 20 offsets.
- A. RUBRUM Webby variety, very webby centers, green, broadly tipped in medium brownish red. Offsets on long stems.
- A. LAGGERI 1" rosettes, very cob-webby, offsets hugging mother plant, producing about 20 offsets, look like little jewels.
- A. DEZERMIT Green cob-webby rosettes
- A. PILOSELLUM Webby variety.
- PURDY'S SANGUINEUM Very small webby, 1/2" green rosettes with reddish outer leaves.
- ARENAREUM Tiny deep green rosette, tipped with red.
- BETTA Green and coppery rosettes tufted with white hairs.
- BRAUNI Large deep bronze rosettes with red tips.
- FAUCONETTI Very green rosettes with fringed hairs.
- FIMBRIATUM Small green and red rosettes - grow nice in clumps.
- HILLEBRANDTII Small with dark green leaves.
- PURDY'S 60-1 Small red rosettes.
- RUTHENICUM Rosettes grayish green leaves.
- TRISTE Medium sized bronzy-green rosettes.
- CANTALICUM 3" rosettes of green tipped with violet.
- LAGGERI Green and red rosettes, densely covered with webby hairs.
- METTENIANUM Flat rosettes, gray-green in color.
- VERLOTH 3" emerald green, red tip.
- VIOLESCENS Grows to 6" grayish rosettes, tinted with violet.
